Rules for Group Seminar

2009.04 修訂

- Held once every week
- Several students perform oral presentation with 25~30 minutes talk per person.
- Subjects may be either progress report or literature review. The speaker should discuss with Prof. Duh concerning the subject of the talk one week in advance.
- For literature review, one should do an extensive survey of a specific topic. Never work on a single paper alone, unless it is a well written review paper.
- Try to express yourself clearly and thoroughly.
- Try to organize yourself in a short time to answer the questions raised. Prepare afterward to complete the answers and the solutions next week if you can’t do it on the spot.
- The standard for the presentation in the group seminar is expected to approach that in the formal international conference. Well prepare yourself.
